### **M.Sc. (Electronics)**

#### **(Semester System)**

EFFECTIVE FROM JULY 2015

M.Sc. Electronics is a four semester course spread over the period of two years. Every semester course consists of four theory courses and two laboratory courses ,each theory course carrying weight-age of 100 marks (4 credits) and lab course of 100 marks (2 Credits). However, in the final semester, there will be one project in lieu of one practical.

The School of Electronics, Pt Ravishankar Shukla University, Raipur offers this course on its campus. It is designed to offer in depth knowledge of the subject starting from its basic concepts to the state of art technologies in use today. Students are also provided extensive laboratory training on the course content and the current requirements of industries and R and D. In the final semester every student has to undertake a project. Advanced papers are offered to the students in the areas of Communications, Photonics, Digital Signal Processing, Embedded Systems, and Power Electronics and Neural network. In addition the course caters to the requirements of providing complete exposure to NET/SET syllabus for Electronics formed by the U.G.C.

The following shall be the scheme of examination for the course:
