Title - Conceiving teaching & research & the connection between the two.

The image is a screenshot of a Zoom meeting. The main content is a presentation slide with the following text:

CONNECTION BETWEEN THE TWO

- Faculty at research universities often define their professional role by the two core faculty activities of teaching and research. However, some scholars (e.g., Barnett, 1992; Feldman, 1987) have proposed that these two activities have inherently divergent purposes and that success in these distinct domains requires different skill sets and personal attributes. Correlational studies examining the relationship between faculty publication rates and teaching quality, assessed generally through course evaluations, have been consistent with this view . These findings, however, conflict with the stance that teaching and research are complementary and support one another, a view espoused by many faculty and their respective universities

At the bottom of the slide, there are navigation icons for back, forward, search, and other controls.

On the right side of the screen, there is a 'Meeting details' panel. It shows 'People (34)' and 'Chat'. Below this, there is a list of participants in the call:

The main content area is a Microsoft PowerPoint slide titled 'Traits of Successful Transformational Leaders'. The slide lists several traits:

- Good transformational leaders practice **self-awareness**
- **Thriving on personal growth** and know their strengths and weaknesses. They often take time to reflect and set daily or weekly goals. These leaders believe everyone, including themselves, should be continually learning and improving.
- **Remaining open to new ideas and fresh perspectives** is an important aspect of transformational leadership. Rather than jumping to conclusions, these leaders regularly gather feedback and ideas from a range of sources before making strategic decisions.
- The best transformational leaders are **adaptable and innovative**
- **Out of Box Thinking** Work dynamics and find innovative ways to stay ahead of the curve. They're unafraid to alter traditional approaches that have worked in the past as they look toward the future.
- Good transformational leaders are **proactive**. Leaders cannot wait for change to happen. Rather, they make **proactive decisions** and bold choices that can set the tone for others to follow.
- **Lead with humility**. They take little issue with admitting they don't have all the answers. While they can remain confident in their goals and abilities, they're also able to keep their egos in check and do what's right for their team or organization.

On the right side of the screen, a grid of participant avatars is visible. The top row includes Reecha Parakh, Pramila Sahu, Partha Sarathi..., and DR AMARENDRA PANI (who is speaking). Other participants include Bhawana Mah..., Anita Patel, Chandrashekh..., jeetendra singh, Sukhavendra G..., geeta rajopad..., Naseem Ahmad, Karobi Mondal, Dr Kalpana Gaur, Satyanarayan..., Ambikesh swar..., and Kapoor Gupta.

Def. "An Educational Institutional of Advanced Learning and Research Conferring Degrees".

- Traditionally Universities have been established as major Institutions for providing higher education and research opportunities to the youth for shaping their future, and recognized as the most important indicator of a country's future.
- *Higher education and research act as essential components of culture, Socio-economic and environmentally sustainable development of Individuals, Communities and Nations.*
- *Since the world is moving rapidly towards digital media, the emergence of ICT has changed the practices of business, governance, education and almost every sphere of human endeavour. Role of ICT in education has become increasingly important . Society is now becoming increasingly Knowledge based, which is continuously on continuum and in turn enables Countries to assess, adapt and apply knowledge beyond cultural diversities and boundaries empowering the Nation as whole.*

• Shift in paradigm from **Teacher-Centric** focus to **Learner-Centric** educational processes and activities , and now to **Technology - Centric**.

• Education is not only rest... is creation and innovation.

Education needs of today and tomorrow are vastly different from those in last few decades.
